MarketStreet at Lynnfield

Project Description

Our many years of experience in the field of construction surveying has enabled us to play a key role in the construction of the recently completed MarketStreet at Lynnfield retail, office, and residential project.

Coneco survey personnel were responsible for laying out every column and foundation corner for over 16 buildings on this 60 plus acre site. Office support included the coordination of architectural design revisions with construction activities so that project delays were kept to a minimum.

In addition to construction layout, Coneco performed extensive foundation as well as utility as-built surveys and prepared certified as-built plans.
